

Proper Omnilux® lens care instructions

"80% of lens scratches" occur by cleaning eyewear incorrectly

Always use warm water and mild soap without additives to clean your lenses. Never clean them dry!

You may also use an approved lens cleaning solution provided by your eye-care professional

After washing, dry your lenses with soft lint-free cloth. You may also use a microfiber cloth specially designed for your eyewear.

Never use glass cleaner or other harsh home cleaners including alcohol. Avoid all chemicals like hair spray, perfume or cologne which could cause damage.

- NEVER use facial tissues or paper towel to dry your lenses as they may scratch.
- NEVER leave your eyeglasses in direct sunlight or in a hot car. The heat can damage your lenses.
- NEVER leave your eyeglasses facing downward.

Always keep your eyeglasses in the case when you are not using them!

OmniLux®

NAL® Natural Accommodation Lens

Over the past 15 years I have worn a number of different progressive lens designs, and, despite many remakes, I have never had a pair that worked for all of my daily activities. I have usually had to resort to readers for clear up-close vision, which sort of defeats the purpose of progressives. I recently received a pair of Natural Accommodation Lenses, and for the first time, I am able to wear them all day long without feeling restricted, no matter what I'm looking at. I'm grateful to finally have a pair of glasses that live up to their promise!

Dana B. | Louisville, KY

My pianist patient wanted me to personally send y'all a note. She was in tears when she told me she had prayed she would meet someone from a lab that would understand what she has been struggling with so long to see while she was playing her piano. She wanted me to thank y'all for being not only so smart but caring.

You guys are GREAT in my book too!!!♥
